WHEREAS, Complaints have been raised by several worthwand virtuous citizens of our venerable and godly city, against the conduct of the teachers engaged in our public schools, and the principles which they, by their example, instil into the young minds of our tender offspring entrusted to their care, we, the undersigned, hereby propose a plan by which we trust all these evils may be counteracted and prevented. Before we expose this judicious plan to the scru tiny of our fellow-citizens, we will make them acquainted with our general character, for, we May have no doubt, that will add a great deal to the commeudability of our suggestions.

We are intelligent, which will certainly be

evident from the tenor of our article; learned, for some of us have read Cæsar, and even Ovid, where we are never perceived to look at the ladies, with their beautiful bonnets, ribbons, dress es, and fixings, and their happy, smiling faces. STEART ROBINSON'S LECTURE.-The Young Men's Christian Association deserve the highest meed of praise for the selection they have made of entinent men to lecture before their Society in this city. Among the lecturers, the Rev. Stuart Robinson will long be remembered for his chaste, eloquent, and classical lecture of last evening. Had we time, it would be gratifving to ourselves, and an intellectual treat to our readers, were we to give a synopsis of the discourse. The eloquence and scholar-hip of Mr. Robinson, however, are too well known to require praise. The audience was large, and their attention gave evidence they were alike named to maker the purpose; the combatants to pleased and instructed with the lecture.

The roof o' the building and other portions of the house were damaged to the amount of \$1,500 probably, and Mr. Pope sustained some loss by the re moval of furniture. The fire was doubtless the work of an ineendiary.

The bill passed and the Senate adjourned. House.—The report of the select committee the case of Edward was taken up.

Mr. Edwards remarked that he could honest ly say, with a clear conscience, that he never gave a vote on any bill which was not sanction ed by his judgment. In his intercourse with members of the House he had sought to be on terms of friendship with them, and if he had unwittingly given offense to my one, he asked his pardon, and he would carry with him in his retirement the conviction that he had never tried to injure any one. He had become satisfied from the votes taken on other cases, that, al ugh gentlemen on all sides sympathized with him, he expected the same fate of others chargel with the same offenses. Therefore he had determined to resign his seat, having already informed the Gov. of New York of that fact.

CHANCE FOR PROFITABLE INVEST MENT!!

FOR SALE OR TO LEASE. THE UNDERSIGNED WOULD INform those who may desire to invest in the Mining business, that they have for sale or to lease a valuable Coal Mine, recently opened, and now in condition to turn ont daily 1,500 bushels, which yield may be increased to any desirable amount by driving the entries. This coal is situated inmediately on the Walash and Erie canal, near the crossing at White river, forty miles from its southern terminus, at Evansville, on the Ohio and Mississippi railroad crosses the canal; fifteen miles from Vincennees, and three from Washington, Davis county. At Evansville, and other places along the line of the canal, this coal is already in very high repute—being considered, by those who have examined and tested it, decidedly superior to any coal yet discovered in the West, and always commanding, in the same markets with them, a higher price than other Western coals. It is a handsome article, rich in bituminous matter, ylelds largely of gas, and makes excellent coke for formfeery purposes, as has been fully shown by experiment within the last twelve months. Such tathe demand for It by the founders and other mannfacturing establishments, to say nothing of the demand for family consumption, that the proprietors, with all their available mining capital, have not been able, thus far, to bring the supply to one tenth part of the demand. The Mine is now in complete working order, with two entries, railways, mining implements, cars, boats, &c. No Mine can be worked cheaper—It being drained by a water level, the coal drawn out by mules and lipped into boats from the mouths of the entries, and no steam or water power, nor expensive machinery of any kind, required. The coal field embraces mear three hundred acres. There are two stratas of coal, an apper (that now being worked) and a lower—the former five feet in thickness, and the latter (a short distance below it) seven feet.
